Dwg.no: 7160-XX-XX-DR-2000-LANDSCAPE PLAN

LANDSCAPE SPECIFICATIONS

Landscape works to be undertaken by an ALCI (Association of Landscape Contractors of Ireland) approved landscape contractor and in accordance with BS 428:1989 Code of practice for general landscape operations (excluding hard surfaces).

Existing boundary hedgerows and trees are to be retained to assist with the visual screening of the proposal into the surrounding landscape in accordance with BS 5837:2012 - Trees in Relation to Construction.

Ground Preparation

Prior to cultivation, planted areas shall be cleared of all loose debris, rubbish, stones over 25mm in diameter, roots, and other extraneous matter. Grass and weeds shall be sprayed with 'Glyphosate' or similar COS/Hi approved herbicide.

Topsoil preparation, quality, depths, cultivation and final grading shall be carried out in suitable weather conditions as per BS 3882:2007 Specification for topsoil and requirements for use. Overall minimum depths after firming and settlement to be:

Woodland / Shrub / Hedgerow areas	500 mm
Lawn and Grass areas	100mm

Proposed Standard Tree Planting

Trees supply and planting shall correspond to BS 8545 Trees from nursery to independence in the landscape - Recommendations. Planting of trees shall be undertaken in favourable weather conditions between October 31st to March 31st.

Tree pits shall be excavated to suitable dimensions to accommodate roots or root balls or baskets with bawes and sides broken up to a minimum depth of 150mm to assist drainage and root penetration. Any unsuitable material such as large clay lumps, bricks, concrete, timber and sand shall be removed off-site. All tree pits shall be backfilled, after planting, with a 3:1 volume mixture of topsoil and mulching compost/manure or similar approved.

The planted trees shall be full and well shaped with crowns thinned by 30% according to good horticultural practice and in a manner that does not affect the overall stature, structure or good appearance of the tree. All work shall conform to a minimum standard as set out in BS 4043:1989 Recommendations for transplanting root-balled trees.

Proposed Hedgerow Planting

Hedgerow plants to be planted at 4 per linear meter (in double staggered row at 500mm centres). Transplants shall be of the size stated and conform to BS 3936 - Part 1: Nursery stock specification for trees and shrubs.

Planting pockets 400x400x300mm deep with cultivated and evenly incorporated: organic manure 100mm layer over area of pk. fertiliser 35g 50mm depth bark mulch dressing on completion of planting.

Shrub and Groundcover Planting

Shrub plants to be planted at 2 to 3 plants per m² and groundcovers at 6 to 7 per m². Transplants and container grown shrubs shall be of the size stated and conform to BS 3936 - Part 1: Nursery stock specification for trees and shrubs.

Planting pockets 400x400x300mm deep with cultivated and evenly incorporated: organic manure 100mm layer over area of pk. fertiliser 35g 75mm depth bark mulch dressing on completion of planting.

Grass Seeding

Coburn's 'GreenLawn' mixture (or similar approved) for general amenity areas. Sowing rate 35g per m².

Maintenance

Initial landscape operations will be undertaken by an ALCI member. The Contractor will be responsible for plant establishment and one year of establishment maintenance. The Landscape Architect will visit site at end of this year and produce a snagging list identifying all defects and outstanding items. Any trees or shrubs dying, damaged or removed will be replaced in the following planting season with plant of similar size and species.
